

Composition of Enhanced Index LA deciles

314 local authorities. Cells show the percentage composition of each Enhanced Index decile by Conventional Index decile.

Decile change (Conventional – Enhanced)
Positive = increased retrofit need

Cell labels are percentages calculated within each Enhanced Index decile and rounded to one decimal place; rows sum to 100% subject to rounding. Colour shows Conventional Index decile minus Enhanced Index decile: positive values indicate increased retrofit need, negative values indicate decreased retrofit need, and zero indicates no change. Blank cells represent zero transitions. Outlined cells represent a change in decile.
